Mid – Ohio Track Guide

The Challenge of the Hills

Mid –Ohio is another challenging track that combines several long and short straights with fifteen turns with unique elevation changes. The "challenge of the hills" refers to six of the fifteen turns, each of which deal with a crest of a hill either at the approach to, middle of, or exit from them. And to add more to the challenge are camber changes at three of those six turns. In essence it is somewhat like a "rollercoaster" ride at an amusement park.

Entering the Track

Line up along pit lane when your group is called

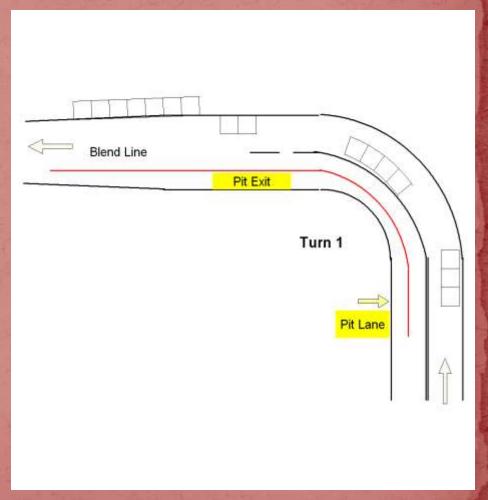

Enter the track promptly when signaled

Stay to the left when exiting pit lane

Check your mirrors for vehicles exiting turn one

Acknowledge and signal those faster cars coming out of turn one with a "pass me on the right" hand signal over the roof

Stay left until the track is clear then blend into the entry line to turn 2
